

**Uninterrupted supply of needles**

Out of  
*Order*

***Be aware of stock levels  
or any issues with  
'Back to Base' Monitoring.***

without having to physically go to site

## ***'Back to Base' monitoring***

We are now able to offer Back to Base Monitoring on our NDU's. Not only will stock levels be available you will also be aware of any mechanical issues without having to go out to site or have the public notify you. A great feature for the more regional area's however it is also handy over public holidays when the demand is at it's highest.

### ***Adjustable shelves***

Our machines have been able to dispense either Fitpack's, Paper rolls or Cardboard box packages. We have now designed adjustable shelves within our G2V0407

Medium Dispensing Units. This allows you the flexibility to choose different types of products to dispense and offer a selection. This feature will be available in our G2V0409 Small Dispensing Units by December this year.

### ***Payment***

Choose if and how payment is accepted by the machine. Free vending, coin or taken based or a combination is available.

## ***AVERT*** *Global information and education on HIV and AIDS*

Global coverage remains inadequate. Of the countries that have NSPs, the majority provide less than the WHO-recommended 200 clean needles per person per year. ***read more}***

Needle and syringe programmes (NSPs) for HIV prevention

## **NEW FEATURES**

As we design and manufacture our machines we can adapt to suit.

We listen to issues our customers deal with and find solutions to include in our next version of machines.

Our latest new feature is adjustable shelves allowing flexibility with the products you want to be dispensed.

*Contact us if you have a requirement our current machines do not cater for.*

## **AUSTRALIAN OWNED**

We are an Australian owned and managed business. Our staff have over 40 years combined Vending Machine experience.
